

← LABOUR GET BRAVER!

We are lesbians, gay men and bisexuals who believe in biological reality and reject the regressive, sexist stereotypes of gender identity ideology.

We champion and celebrate same-sex attracted people and tackle discrimination against LGB people wherever we find it,

- Supporting young LGB people to feel good about their sexuality
- Campaigning against gender identity propaganda in schools and colleges
- Exposing the risks and dangers of puberty blockers
- Defending our right to same-sex spaces and organisations

We've been rejected from the Labour Party Conference for our views but we won't be silenced.

Join us at our fringe event on 8 October between 12.30pm and 4pm.

Grab some lunch, network and be part of the conversation. What does Labour need to do to regain the trust of lesbians, gay men and bisexuals?

Paula Boulton, Co-founder of Lesbian Labour

We are the voice of lesbians in the Labour Party. We encourage lesbians to join, campaign and vote for Labour and to stand for political and public office. To make Labour a welcoming party for lesbians, we promote lesbian equality throughout the party and support each other to resist lesbian erasure. We stand in solidarity with our Labour and trade union sisters nationally and internationally.

Dennis Kavanagh, Founder of the Gay Men's Network

We exist to fight homophobia in all its forms. We say that homosexuality is exclusive by definition and by nature and that homosexual men should be free to live their lives without being disadvantaged, shamed or persecuted on the basis of being same-sex attracted.

Formed in 2021, we are a varied cross-section of gay men from different backgrounds, professions, and locations across the UK. Our grassroots organisation focuses on upholding our rights and freedoms and fighting homophobia.

Kate Barker, CEO, LGB Alliance

We are the only UK charity that exclusively supports same-sex attracted people and we work to achieve a world where lesbians, gay men and bisexuals can live free from discrimination or disadvantage.
